

BRUSHES FOR COWS

Our special brushes for the automatic grooming of cattle are spontaneously wanted and used with enthusiasm by all animals, as they answer an essential physiological requirement.

After the grooming, cows look better and are more peaceful, with important positive consequences on the production performance as well.

The regular use of brushes assures a drastic reduction of unwanted hair, knots and parasites that usually plague the cattle, resulting in a decided improvement of the overall health condition.

Our double-brush system is the only one that assures a wide massaging effect thanks to its special shape that allows to groom the back and the flanks at the same time, 'from hock to withers'.

The massaging action of the double brush acts on a large body surface, thus making the perspiration easier and strengthening the metabolism.

Very common in the best farmings, this system has been successfully tested by now and it is recommended by veterinary, farmers and experimental research centres.

ADVANTAGES

- 1) *Grooming of most of the coat, from hock to withers;*
- 2) *Decided improvement in the cleanliness level;*
- 3) *Better look and greater calm;*
- 4) *Free from parasites, hair knots and itching;*
- 5) *Better superficial blood circulation and better metabolism;*
- 6) *Better overall health conditions;*
- 7) *Greater production performance*

SPECIFICATIONS

- 1) *Easy installation on wall or support;*
- 2) *Usable indoors and outdoors;*
- 3) *Suitable for different-sized animals;*
- 4) *Automatic starting with lifting;*
- 5) *Side oscillation under pressure;*
- 6) *Automatic change of the rotation direction in case of overload;*
- 7) *Ergonomic shape of the brushes;*
- 8) *Constant angle of the brush (100°);*
- 9) *Hot-galvanized frame for a long life;*
- 10) *Nylon-cut strong bristles;*
- 11) *Motor protected from jets and dust;*
- 12) *Maintenance-free transmission system;*
- 13) *Very low operating costs;*
- 14) *Electric motor 230V/50Hz, power 0.37 kw, 60 rev./min.;*
- 15) *Overall projections 1100 mm / weight 135 kg*
