AVOID INDIVIDUAL HOUSING

Keep calves in small groups of 2-7 animals with similar age to foster social interaction

FREE SPACE

Calves must have sufficient space to rest in a relaxed position: at least 3 sqm per animal

NEXT STEP: COW-CALF CONTACT

Cow and calf need to stay together for at least 1 day

COMFORTABLE BEDDING

It is necessary to provide bedding for the calves comfort

Rota Guido's TWIN BOX meets all the animal welfare requirements announced by the European Food Safety Authority.

Because each **CALF** counts

WHAT'S NEW:

HOUSING OF CALVES IN PAIRS
IN A 6 SQM MODULAR BOX:
EACH ANIMAL HAS 3 SQM OF
FREE SPACE WITH A CENTRAL
UNIT, EASILY REMOVABLE BY
THE FARMER, TO REACH
6 SQM IN TOTAL.

#letschallengethefuturetogether

Follow us on:

TwinBOX Modular **SINGLE** row

Because each
CALF counts

TwinBOX Modular **DOUBLE** row

ADVANTAGES TwinBOX

- Encourage contact between calf in pairs
- 3 sqm space per calf, with removable central unit to reach 6 sqm in total
 - Air volume per calf: 15 m³
 - Animal welfare
- Biosecurity (batch management 'all in-all out')
- Optimal ventilation (air exchange and air velocity control above the calf)
- Minimizing construction works (box made on the ground, on bedding, with full floor in slope to collect manures)
 - Mechanical cleaning option
 - Modular single or double row calf barn
 - Fully prefabricated structure
- Integration with all automated feeding systems
